

V5025A

FLANGED LINEAR VALVE PN25

SPECIFICATION DATA

GENERAL

These single-seated valves are suitable for use in conjunction with the modulating control of hot / chilled water in closed heating, ventilating, and air conditioning systems. They are designed especially for use in high differential pressure applications (e.g. district heating) and can be operated by linear actuators ML6420/ML6425, ML7420/ML7425, or ML6421/ML7421 or by pneumatic actuators MP953.

FEATURES

- Pressure-balanced plug
- Nodular iron body with flanged end connections
- Low seat leakage rate
- Metal-to-metal seating for long life span
- Self-adjusting packing
- Accurate positioning to ensure state-of-the-art temperature control
- Easy mounting of direct-coupled electric and pneumatic actuators
- Approved according to DIN EN 14597 in DN15...80 in combination with ML6425/ML7425

INSTALLATION

- Water should meet VDI 2035 requirements.
- Do not install valve with stem below the horizontal.
- Fluid flow must correspond with the arrow direction on the valve body.
- The installation of a strainer is strongly recommended.
